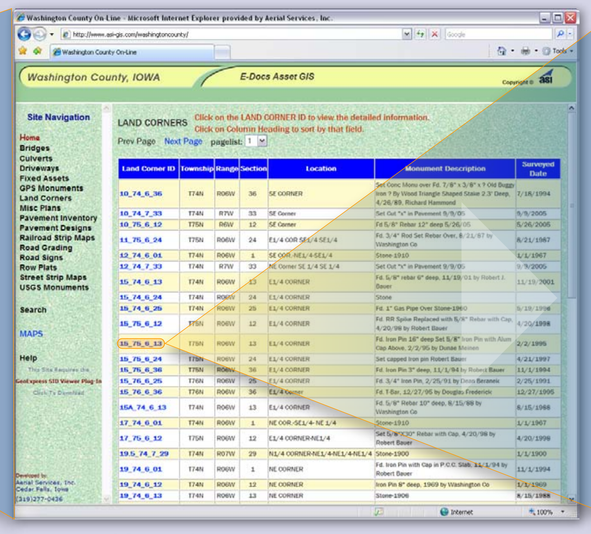
E-Docs Asset GIS

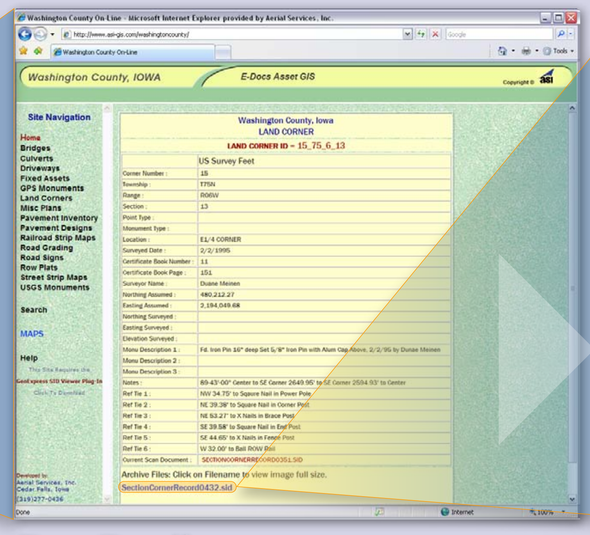
Washington County, Iowa
Aerial Services, Inc.

Navigate Asset Database

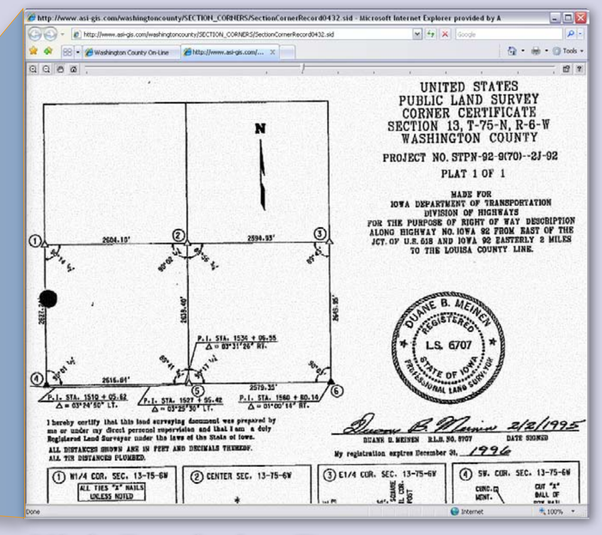
Easy Online Access
Users can access the site 24/7 and immediately find original documents related to a variety of assets.



Asset Database
Important details describing each asset are available for quick user reference.



Data Details
All details about an asset are immediately available to the user on each asset page.



High-Resolution Documents
High-resolution scans of each document are available for close inspection.

Interactive Asset GIS

User Controlled Map
Users can easily view all assets in geospatial context.

Asset Information With A Click
The same details available from the database are also available directly from the GIS.

Catalog Of Data Viewable
High-resolution scans of original documents allow users to discern all details as if they held the document.

Project Workflow

Making A Difference

The Washington County E-Docs Asset GIS took existing geospatial technologies and meshed them together in innovative ways to empower end-users with critical textual and geospatial information like never before.

E-Docs GIS is making a difference in the Washington County Engineer's office and exemplifies how geospatial technology, tactics, and innovation can solve real-world problems cost-effectively.

E-Docs GIS is breaking ground and expanding the geospatial industry's scope, market, and image.
